EZI LOADER ALUMINIUM RAMPS

EZI-LOADA

A light weight ramp with enhanced safety that delivers on quality, performance and is cost effective.

European designed and engineered, the new Digga Ezi Loada ramps are the most advanced design on the Australian market today.

Features:

- 3 ways of attaching the ramps
 - > Pin (supplied)
 - > Tongue (supplied)
 - > Chain (chain not supplied)
- Patented, fully extruded, double T-beam design, interlocks the rungs into the body of the rail. No physical load is taken by the weld alone. The welds (top & bottom), hold the rung in its fitted position, adding superior strength & durability.
- Certified to the highest international standards CE, GS and TUV guaranteeing the quality and safety of the ramps.
- Reinforced, easy load, lead on/off design are safer and more durable than conventional ramp designs.
- The reinforced bottom rung sits low to the ground ensuring machines don't have to 'step up' onto the ramp. As a result the bottom few rungs won't bend, as so often is the case with current ramp designs. The ride is also much smoother.
